

BARLINEK

IT MOVES ME!

Anna Wesecka

Barlinek is a town situated in the southern part of the Westpomeranian Region, with a history dating back to 1278. In the past, this well-known and popular resort was known as “the Pearl of New March”, and has retained the character of a tourist town ever since. The town is located within the Barlinecko-Gorzowski Landscape Park, in the vicinity of the Płonia River Valley, also called the “Bieszczady Mountains of Barlinek”.

Emanuel Lasker, world-class chess master, philosopher, mathematician, and the unquestionable ruler of the chess world for 27 years in a row, was born here in 1868.

In addition to numerous hotels and guest houses, Barlinek has a broad food establishment base, and a wide range of leisure activities.

Barlinek is an exceptional place on the map of Poland, as it can astonish every tourist, not only with the enchanting beauty of its lakes and the surrounding nature, but also with the multitude of attractions. We invite our guests to take part in the Barlinek Days, featuring the Queen of the Barlinecka Forest Competition, the Polish Nordic Walking Championship, the All-Polish Sailing Regatta, and many other events.

Enthusiasts of spending their free time actively will enjoy such attractions as cruises on the lake, angling, tennis, or bowling. Over 250 km of trails have been prepared for tourists to admire the beauty of the town and the surrounding area. Cycle paths, pedestrian routes, waterways, town routes, and, of course, 7 Nordic Walking routes, are available for tourists visiting the Barlinecka Forest, who can also travel along the Adventure Trail around the Barlineckie Lake. Hunting enthusiasts coming to the Barlinecka Forest are guaranteed a multitude of experiences, and excellent trophies. People who are passionate about cultural heritage and history are welcome to visit the Regional Museum in Barlinek, and the Museum of the Oflag Woldenberg Prisoners and Countryside in Dziedzice, where they can learn about the intriguing history of our land.

You are welcome to come to Barlinek!

INVESTMENT AREAS – OKRĘTOWA ST.

The area is situated in the south-west part of the Westpomeranian Region, in Barlinek, on Okrętowa St.

The area is characterised by excellent accessibility via two voivodeship roads – Nos. 151 and 156 – leading to the S3 express way (within a 27-km distance), and the A2 motorway (within a 125-km distance).

The area is located near large agglomerations, i.e. Gorzów Wlkp. (35 km away), Szczecin (80 km), Poznań (160 km), and Berlin (165 km).

The companies operating in close vicinity to the area include Barlinek Inwestycje Sp. z o.o., Gaspol S.A., INT. PRODUCTION JCS Sp. z o.o., Silikaty Barlinek, and VEGA Przedsiębiorstwo PPHU.

The area is covered by the Local Land Development Plan adopted under Resolution No. XLII/603/2009 of the Barlinek Town Council dated 25 June 2009 (<http://gmina.barlinek.sisco.info/?id=4209>), and is intended for production and storage purposes, including production plant buildings with office premises, storage premises and warehouses, and commercial development.

The area of approx. 11 ha consists of the parcels of land registered under Nos. 123/4, 123/6, 123/8, 123/12, 140/2, 142, 145, 146/1, 146/2, 146/3, 339/1, 339/2 and 400, within the Barlinek 1 cadastral district. It is possible to expand the said area beyond the aforementioned parcels of land by including other real properties which are covered by the local land development plan, and are intended for investment. They cover an area of approx. 30 ha.

The land belongs to private owners.

An internal road was built within the area in 2018, and full availability of utilities was provided (including the water supply and sewerage systems, and street lighting). Further road sections serving the purposes of the investment areas are currently under construction.

BARLINEK, JEZIORNA ST. – „STARY TARTAK” (“THE OLD SAWMILL”)

An attractive real property intended for recreation and tourism, and hotel and guest-house operations – “former sawmill areas.” This real property is situated within the most beautiful landscape area of western Poland, near the picturesque Barlineckie Lake. The area is characterised by excellent accessibility via two voivodeship roads – Nos. 151 and 156 – leading to the S3 express way (within a 27-km distance), and the A2 motorway (within a 125-km distance of Barlinek).

The area is located near large agglomerations, i.e. Gorzów Wlkp. (35 km away), Szczecin (80 km), Poznań (160 km) and Berlin (165 km).

The area is covered by the Local Land Development Plan adopted under Resolution No. LV/461/2018 of the Barlinek Town Council dated 28 June 2018 (<http://gmina.barlinek.sisco.info/?id=12478>), and is intended for tourism purposes. The provisions of the local development plan leave space for flexibility and freedom in the field of dividing and adapting the size of a given real property to the scope of the investment being planned. The total area is 7.4700 ha. The real property includes parcels of land registered under Nos. 243/34, 243/36 and 243/42, within the Barlinek 2 cadastral district. It is possible to divide the real property into smaller parcels of land, according to investors’ requirements.

The Barlinek Commune is the owner of the entire area.

The Barlinek Commune has provided such utilities as an internal road serving the purposes of real properties intended for future investments, storm and sanitary drainage systems, a water supply system, service trenches, and lighting.

This wasteland and tree-covered area is currently mostly unused. The remnants of a former industrial plant (a sawmill) cover part of the said area.

The project, involving the construction of the Municipal Leisure and Social Integration Centre, is due to be implemented in 2020. •

AN INNOVATIVE MOBILE PLATFORM FOR SHAFT SINKING

For the mining industry to develop, it is necessary to access resources that are deposited deeper and deeper into the ground. And this, in turn, requires new shafts to be sunk and the existing ones to be sunk even deeper. MWM Elektro Spółka z o. o., a limited liability company from Trzebinia, has developed a mobile container platform – an innovative drive solution for vertical transportation systems in mining. The product is designed for temporary structures and intended for mining companies and mining contractors.

Traditional equipment necessary for shaft sinking or deepening requires permanent infrastructure (buildings, structures, chambers, etc.), which is time-consuming (from several months to over a year) and expensive, and requires a large area for construction purposes. In addition, such permanent infrastructure is not environmentally friendly, as the elements from the disassembled infrastructure cannot be reused, and the site requires extensive reclamation. With this original solution, in which the whole platform is container-based, the building footprint area can

be reduced, as can be the total assembly and construction times (to as little as two months), thus cutting the expenditure required to prepare vertical mining transport systems for operation.

The platform comprises containers with machine subassemblies, pre-fabricated foundation blocks and frames. Once delivered to the site, the modules are set up and joined to quickly create a complete platform with the average throughput of 200 tonnes per hour.

The containers serve as module housing during operation, transport and storage. Although small, the platform allows the systems installed inside to be operated easily and comfortably. Nearly all its modules have sizes and weights suitable for standard-load transport.

This project has delivered an ergonomic reusable solution that can be deployed in various conditions and to any operating specifications. And it delivers high reliability and operating safety. •
